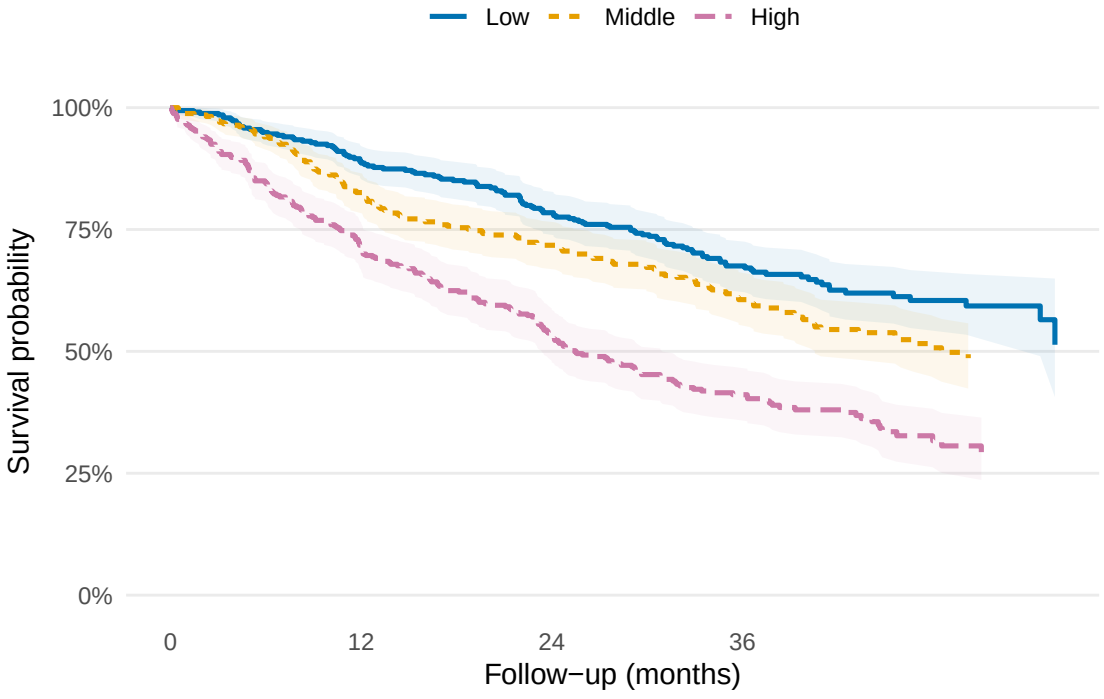
A Survival by biomarker group

All−cause mortality | n = 1000 | Log−rank P = 3.46e−15

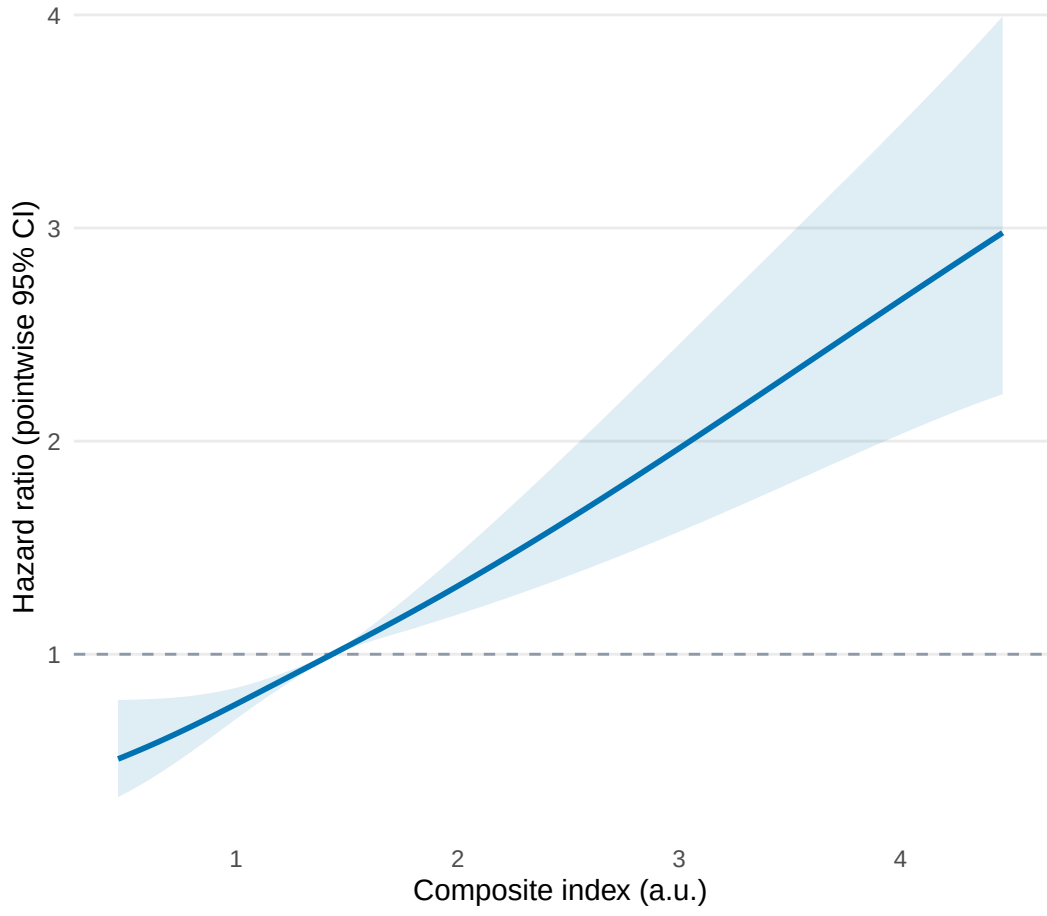


Number at risk

Low	334	297	262	164
Middle	333	275	239	147
High	333	239	178	102

B Adjusted exposure−response

Natural cubic spline | Nonlinear P = 0.0273



SYNTHETIC DATA | Reproducible demonstration; no patient observations.
